Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 August 2006.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-21 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakai et al. (US 5,679,456). Regarding claims 11 and 39, Sakai ('456) discloses a twin-screw extruder comprising two closely intermeshed screws (see col. 10, lines 12-13) rotating in the same direction (see col. 10, line 66), each of the screw supporting at least one comb element (see for example Fig. 4g and col. 9, lines 42-44) defining an involute surface and comprising a plurality of axially spaced apart rows of circumferentially spaced-apart structure elements (22) which extend inwardly from the involute surface in the absence of intermeshing of the individual surface elements (see col. 10, lines 33-34). Regarding claim 12 and 21, the comb element, as viewed in the transport direction, is arranged downstream of a feed device (see Fig. 18). Regarding claims 13-18, "the manner or method in which such machine is to be utilized is not germane to the issue of patentability of the machine itself" *In re Casey*, 152 USPQ 235 (CCPA 1967) and "inclusion of material or article worked upon by a structure being claimed, does not impart patentability to the claims" *In re Otto* 136 USPQ 458, 459 (CCPA 1963). "Expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim." *Ex parte*

Thibault, 164 USPQ 666, 667 (Bd. App. 1969). Regarding claims 19 and 20, Fig. 4g shows numerous rows of elements (22), subsets of which can properly be considered plural axially spaced apart comb elements.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 31-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakai et al. (US 5,679,456). The extruder of Sakai et al. (US 5,679,456) was discussed above with regard to claim 11. The exact dimension and shapes of these claims are not expressly disclosed, However, *In re Rose* 105 USPQ 237 (CCPA 1955) and *Gardner v. TEC System, Inc.* 220 USPQ 777 (Fed. Cir. 1984) are relied upon regarding the obviousness of selecting a size and *In re Dailey* 149 USPQ 47 (CCPA 1966) is relied upon regarding the obviousness of selecting a shape.

Response to Arguments

5. Applicant's arguments are moot in view of the new grounds of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
